Technical Skills

HTML5 | CSS3 | Bootstrap | Javascript | JQuery | SQLite | Node.js | Ruby on Rails

Development Projects

Chess-vs   GitHub | Live

A Chess experience using websockets with live chat
- Node.js provided a stable and easy environment for using websockets
- Combined Chess.js and Chessboard.js for the display and game logic
- Next I would like to implement an AI and private rooms

Oddjobs   GitHub | Live

A Rails app for posting and accepting odd jobs
- Implemented the Ratey-Rate gem to allow for rating a user based on certain params
- Created a method for averaging the ratings to display them on the home page
- Handled routing and database relations for all models

Experience

Learning Assistant — *New York Code + Design Academy*   Dec. 2017 - Current
- Work with students on their school and personal projects
- Guide students to solutions
- Grade assignments and take attendance daily

Web Development Intern — *BOOTCAMPED*   Oct. 2017 - Nov. 2017
